Summary

BTech CSE sophomore (Panjab University) building production-deployed MERN applications. Built a full LMS platform with Razorpay payments, JWT auth, and role-based access — live in production. Backend-focused with hands-on experience in REST API design, MongoDB schema optimization, and Express.js. Looking for backend/full-stack internship where I can ship real features.

Experience & Projects

EdTech LMS

Production Deployed

Full Stack Learning Management System

MERN • Redux • JWT • Razorpay • Tailwind CSS

- Built a production-deployed LMS with course creation, enrollment, lecture management, and progress tracking.
- Implemented JWT authentication with role-based access control for Admin, Instructor, and Student workflows.
- Developed 12+ REST API endpoints using Express.js and optimized MongoDB schemas for course and user operations.
- Integrated Razorpay payment gateway for secure course purchases and deployed frontend/backend on Vercel and Render.

Real-Time Chat Application

GitHub

Node.js • Express.js • MongoDB • Socket.IO • JWT • React

- Built a real-time chat platform with Socket.IO supporting live messaging, online/offline presence, typing indicators, and `lastSeen` tracking.
- Implemented features such as *sent*, *delivered*, *read* receipts using socket events and MongoDB batch updates.
- Developed OTP-based JWT authentication with secure `httpOnly` cookies and protected REST APIs.
- Added emoji reactions, unread message counters, and 24-hour disappearing status/stories functionality.
- Designed 5 Mongoose models (User, Conversation, Message, Status, Reaction) with indexed queries for real-time performance.
